

Grid connection fees for 2024 (€, VAT 0 %)

Connection to an existing 400 kV substation 2 200 000

Connection to an existing 220 kV substation 1 400 000

Connection to an existing 110 kV substation 800 000

If a new main grid substation is built for the need of a single Customer, Fingrid will charge the Customer a connection fee for each circuit breaker field built in the new substation.

Connection to Fingrid's 110 kV power line: 800 000

The connection fee for the power line connection is charged based on the total rated power of transformers connected. A connection fee is charged for each starting rated power of 25 MVA (ONAN) or 31.5 MVA (ONAF), however, a maximum of two connection fees per connection.

If new connections are built to the substation built for the need of a single Customer during the first ten years after the commissioning of the substation for a third party or Fingrid, Fingrid will refund the deduction of the first connection fee paid to Fingrid at the time and the substation connection fee valid at the time of commissioning of the new connection.
