Grid connection fees in year 2020-2015

| Grid Connection fees € (excl. VAT) | 2020 | 2019 | 2018 | 2017 | 2016 | 2015 |
|---|-----------|-----------|-----------|-----------|-----------|-----------|
| Connection to an existing 400 kV substation | 2 000 000 | 2 000 000 | 2 000 000 | 2 000 000 | 2 000 000 | 2 000 000 |
| Connection to an existing 220 kV substation | 1 200 000 | 1 200 000 | 1 200 000 | 1 200 000 | 1 200 000 | 1 200 000 |
| Connection to an existing 110 kV substation If a new substation is built for a connection in the transmission grid, the customer bears the full construction costs of the substation. | 600 000 | 600 000 | 600 000 | 600 000 | 600 000 | 600 000 |
| Connection to a 110 kV power transmission line If additional transformer of a maximum of 25 MVA is added to the same power line connection, the customer pays a connection fee of 0.5 million euros for it. In case, the electricity transmission in the main grid caused by the substation does not exceed 25 MVA, a connection fee is not charged from the customer. | 600 000 | 600 000 | 600 000 | 500 000 | 500 000 | 500 000 |
