

Main grid connection fees in 2019

Connection to an existing 400 kV substation: **EUR 2.0 million**

Connection to an existing 220 kV substation: **EUR 1.2 million**

Connection to an existing 110 kV substation: **EUR 0.6 million**

- If a new substation is built for a customer, all construction costs are paid by the customer.

Connection to a 110 kV power transmission line: **EUR 0.6 million**

If during the ten years from the commissioning of the substation new connections are built for a third party or Fingrid, the main grid connection fee is compensated to the primary customer. The valid main grid connection fee is deducted from the compensation.
