

# Grid connection fees for 2022 (EUR, excl. VAT)

Connection to an existing 400 kV substation **2 000 000**

Connection to an existing 220 kV substation **1 200 000**

Connection to an existing 110 kV substation **600 000**

➤ If a new substation is built for a customer, all construction costs are paid by the customer.

Connection to a 110 kV power transmission line **600 000**

If during the ten years from the commissioning of the substation new connections are built for a third party or Fingrid, the main grid connection fee is compensated to the primary customer. The valid main grid connection fee is deducted from the compensation.
