Procurement of automatic Frequency Restoration Reserve (aFRR) in Q4/2025

The aFRR procurement volume for downwards balancing will be reduced in Q4/2025 during evening and night hours. The current upwards volume will be unchanged in Q4/2025.

The main basis for the procurement is the TSO goal for frequency quality level.

Nordic aFRR volumes per hour

From 1st of October, the total volume for upwards balancing will vary between 250 - 275 MW and for downwards balancing between 300 - 375 MW.

aFRR will be procured for all hours and all days of the week as detailed below. Hours in Central European Time (CET).
